

Guest Speaker Program

An invitation to share how AI is shaping your work

About the Club

The Applied AI Club is a student organization at Penn State dedicated to helping students understand how AI is changing the way businesses operate. Our membership is primarily based in the Smeal College of Business, though we welcome students from all colleges and majors. We run three programs:

Events and Programming. Guest speakers, tool walkthroughs, and discussions about how AI is changing business and the workplace. This is where the majority of our members spend their time.

Applied AI Labs. Our technical division, where a smaller group of members build real applications from start to finish using the same tools and workflows found in professional engineering teams.

Explore AI. A public registry of 18 AI tools across four categories, organized by what you want to accomplish. Each listing provides a straightforward description maintained by club members.

We begin formal meetings in Fall 2026 at Penn State University Park. We are currently in our pilot semester and scheduling our first speakers.

Who We Are Looking For

Professionals from any field whose work has been shaped by AI in some meaningful way. Technical expertise is valuable, and so is a perspective from someone whose role had little to do with technology until recently. We welcome speakers from finance, marketing, consulting, healthcare, law, education, startups, or government. What matters most is that you can communicate your experience in a way that a student with no background in your field could follow.

What We Ask

- 30 to 45 minutes of your time, including Q&A
- Zoom or in person at Penn State University Park, whichever works best for your schedule
- A brief description of what you would like to discuss, so we can share it with our members ahead of time

What You Get

- An engaged audience of students who are actively learning AI and show up because they want to be there
- A recorded copy of your session, if you would like one for your own use
- A lasting connection to a student community that will remember the people who invested in them early
